EMINENCE IN QUALITY

Spectrum's advanced engineering in window technology is an ongoing process that gives you a long-lasting quality product. A prolonged life, with no maintenance requirements, means peace of mind and a great looking window that continues to improve the value of your biggest asset, your home. Extreme temperatures and severe weather exposure have no effect on doors and windows, continually performing perfectly in all conditions.

In our busy lives full of hustle and bustle, a little peace and quiet is of paramount value. Protection from noise is an important characteristic of a modern window, ensuring a comfortable life, both at home and in the office.

TECHNICAL DOMINANCE

ADVANCE

TECHNICAL PROPERTIES THAT SET US APART

- Thermal Efficiency Insulation
- Termite Resistance
- Fire Safety
- Maximum Water Tightness
- Material & Structural Performance
- Maximum Wind Resistance

At Spectrum, we've got you covered from the hottest summers to the iciest winters. Our competitive and aesthetic designs help you to enjoy a perfectly comfortable atmosphere in the comfort of your homes, insulated from the outside temperatures, providing you the best available thermal performance possible today.

WEATHER

ALL WEATHER COMPLIANCE

In our country, with such a variety of weather conditions, timber windows and doors are often destroyed by termites. Spectrum windows and doors systems are fully resistant to these pests, thanks to our scientifically developed compound technology.

Fire tests have shown that materials are naturally flame retardant throughout their product life. They will not cause, support or enhance the development of accidental fire. Unlike timber windows, the profiles do not support combustion and are in fact self-extinguishing.

Spectrum windows and doors systems have been successfully used in swimming pool facilities, marine and ocean environments without any detriment to its surface-finish or performance. Weather-tightness and its resistance to driving rain is one of the main assets of Spectrum windows and doors.

DURABLE AND STEADFAST

You are only as good as your track record! The longevity and superior quality of uPVC has been conclusively proven for over 40 years. Spectrum's material compound performs and exceeds worldwide standards for strength, durability, heat-stability, colour-retention and termite-resistance.

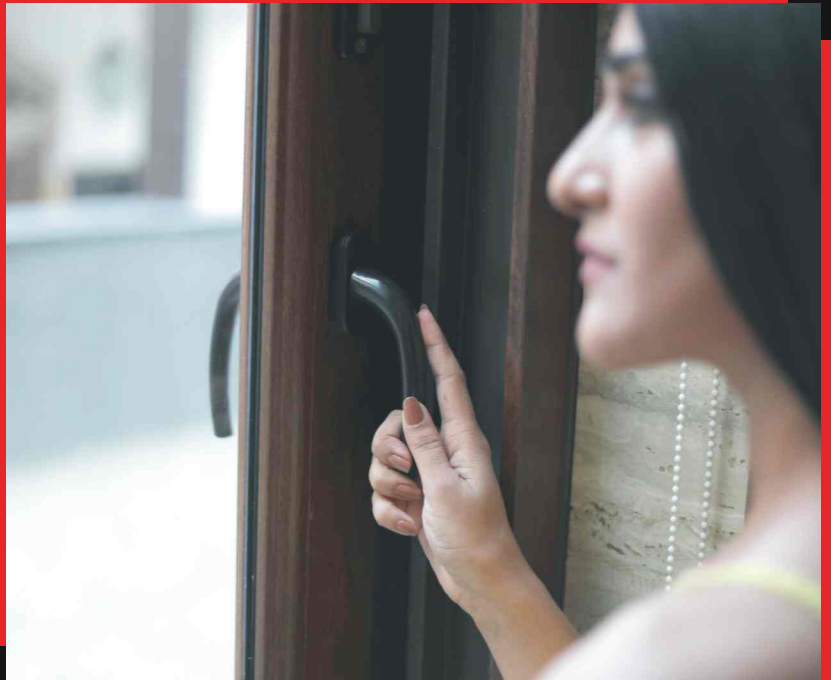

Due to our high-quality material properties and gasket technology, Spectrum windows and doors are ideal for installation in seaside locations and areas with extreme wind exposure. Salty air, strong winds and extreme weather conditions have no effect on performance.

PROTEC

PROTECTION & SECURITY

Your family is your world and protecting them is an instinctive part of our nature. The need for protection and security is part of our lives from a young age to adult hood. Protecting our material possessions is also important and feeling safe and secure in our homes is as simple as choosing the right doors and windows.

Spectrum's high-security hardware and excellent frame strength gives you that security and peace of mind.

TECTION & SECURITY

USER-FRIENDLY & MODERN

Four Seasons Spectrum Tilt & Turn, Casement & Awning windows are a modern engineering marvel. They are a proof that even the most technical aspects of design can yield aesthetic results.

Windows are to a house, what eyes are to a human body. Their design reflects your personality and delivers your style to the outside world. Not only do they brighten your day, they cater to your well-being by protecting you from undesirable weather and intruders. User friendliness should never be compromised so our innovative hardware technology provides your family the key to security and modern living. Spectrum windows offer simplicity and delivers perfect harmony with both the architecture and the decoration of your house. Their warm and soft lines hint at the origins of a classical and modern style, while the tactile features achieve the visual appeal.

Spectrum Showroom

INNOVATIVE DESIGNS

The design of Spectrum windows has been distilled from continual product excellence. Our designers and engineers have made geometrical calculations of the frame, creating wonders of technology and success by increasing frame strength and visible light at the same time.

Harnessing the advantages of symmetric profile, Spectrum windows provide the same visible aesthetics both from the inside and the outside of your house. Open or closed, Spectrum windows will become part of your personal style.

DOORS

Spectrum doors are much more than a beautifully designed portal to the outside world. They are also unparalleled in strength, security and fully guaranteed to perform as well in years to come as it does today. Spectrum doors have many noticeable properties that are designed to discourage any intruders.

SOLUTIONS

SEED

LIFT & SLIDE

Spectrum Lift & Slide System expands interior spaces and easily opens them to the outside expanse. It quickly integrates your interior space with terrace, balcony or garden in an elegant and practical way, leaving a spectacular living and entertaining area.

Spectrum Lift & Slide System makes your spaces weather-proof, protecting you against the elements while forming a transparent wall with comfort and spaciousness.

These doors provide complete freedom of movement and can be customized with changing times, demands and user requirements.

Providing elegance and an abundance of perceived space, its high-tech operating system enables you to move unusually wide doors easily, as if floating on air.

Spectrum Lift & Slide can be applied with several glass thicknesses (maximum glass thickness is 38 mm). The system is highly-durable to hot or cold weather elements, rain, moisture and provides the best solutions for architectural projects requiring wide openings.

BI-FOLD

These elegant, concertina doors add a wow factor to any home or premises, and seamlessly connect our outdoor and indoor spaces. Once folded back, they create a large opening for easy access. Particularly suited for new - build projects, these designer folding doors are becoming increasingly popular as property developers seek to differentiate their homes. This design is the chosen one for several home- owners too, who are increasingly demanding sophisticated products for interiors and exteriors. Spectrum has carefully designed its bi-fold door system to offer smooth, simple functionality with a bottom or top rail concertina mechanism. The versatility of the Spectrum bi-fold door means that you can use it to create a glass wall up to an impressive 6 meters width. Our window and door systems boast of everything you would expect from the best there is!

HARDWARE

Spectrum offers you a wide range of hardware selection with unique pieces intended to create an ensemble in your interiors, that are not only functional in performance, but also world class, durable and incredibly fashionable. We are primarily focused on providing hardware that takes on a new personality, when paired with aesthetic décor of your homes, to create an effect that is eclectic and sophisticated.

Just as the coin cannot exist without its two sides, I would suggest that our world cannot exist without these so called opposites because they give us a

SPECTRUM

to exist in, a matrix, or framework, that stretches between the two extremes (or polarities) to include every variation of light and shade that we sense or experience in-between.
